THE SEA TURTLE

Artist: Maria Rivera

CARAPACE (Upper Shell)
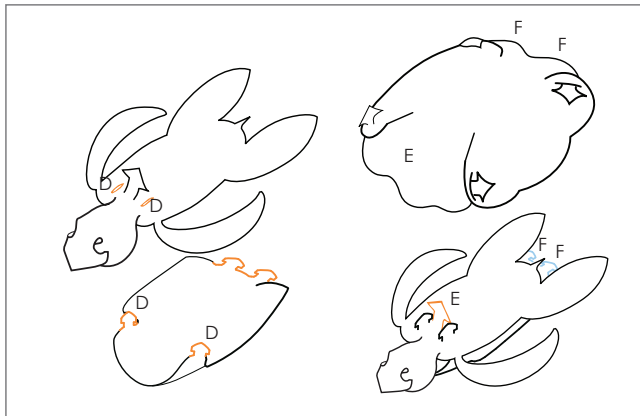

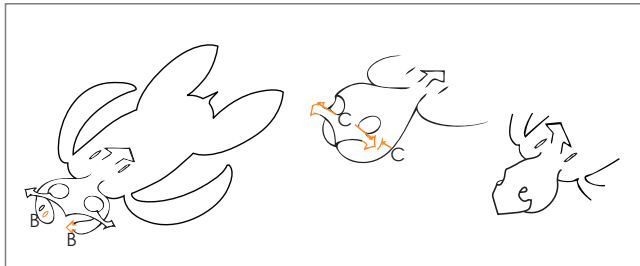

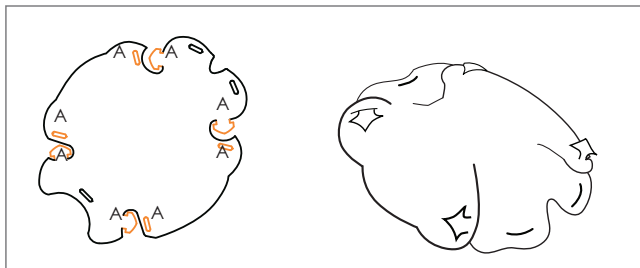

BODY

PLASTRON (Lower Shell)

HEAD

TAIL
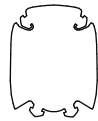

Create some underwater fun by making your own Sea Turtle!

1. Punch out the sea turtle pieces and make sure to clear all the slots

2. Take the upper shell. Stick tabs 'A' into slots "A". You've made the shell.

3. Take the body of your sea turtle. To build the face, bend tab "B" around and place in slots "B".

4. To complete the face, bend tabs "C and place into slots "C".

5. Take the body and place it on top of the lower shell. Make sure your shell is facing the right way.

6. Place tabs "D", the ones under your turtle's shoulders, into slots "D".

7. Almost there!

8. Place the Upper Shell on top of your turtle. The front of the shell has one open slot. The back of the shell has two open slots. Make sure your shell is facing the right way.

9. To connect the body of your turtle to its shell, place tab "E" into slot "E".

10. Connect the upper shell and the lower shell by placing tabs "F" into slots "F".

11. Congratulations! You have just made your very own Sea Turtle.
